Scanner compatibility with **Mac** computers.

Keeping files organized on your **Mac** is often a daunting task. Now add the need to scan paper documents, business cards and pictures and it becomes even a bit more complex.

We are pleased to make available **Mac** drivers for a wide range of our high performance document and photo scanners. With a free download, many of our feature-rich document imaging scanners are now compatible with **Apple's** OS X operating system.

A unique integration of **NewSoft's Presto! PageManager** with Kodak Alaris' Perfect Page image processing makes it extraordinarily simple to scan, organize and share information in a business scanning environment. The software allows users to create, edit and manage PDF files without requiring other applications or file conversion software.

To enable your **Kodak** Scanner to work with your **Mac**, please go to **www.kodakalaris.com/go/macscanners** and follow the links to download the **Mac** driver and **PageManager** capture application for your scanner model.

The following **Kodak** Scanners and accessories are **Mac** compatible:
